*Add a business telephone for only \$34.95 per line.*

Current BIT members will be able to retain DSL services at this time. Those rates will remain the same following the acquisition. Once fiber is deployed to a location, all members will be moved to fiber and its associated rates, which are less than what members are currently paying for DSL or fiber services from BIT.

Additionally, telephone services will become optional to fiber accounts. Members will not be obligated to carry telephone services with EMPOWER. However, once DSL/copper lines have been replaced with fiber optic cables, members must sign-up for fiber services in order to receive home telephone service.
